WHAT PUBLIC DOCUMENTS ARE AND HOW TO GET THEM

THE Government of the United States is the greatest of all modern publishers. It employs thousands of scientists, who are engaged the year round in making researches and investigations in all branches of agriculture and household economy, in geology, in mining, in electricity, in chemistry, in astronomy, in engineering, in aviation, in preventive medicine, in forestry, in irrigation, in shipping and railroad problems, in trade and manufactures. The arts of war as well as those of peace are also actively cultivated. The greatest art of all, that of maintaining and spreading free government, is strenuously carried on by President, Cabinet, Senators, Representatives, Army, and Navy.

The results of all these activities of the most comprehensive and effective organization ever known, are constantly reduced to print and poured out in an incessant flood from the Government Printing Office at Washington, the largest printing plant in the world.

The greater number of these public documents are sold by the Superintendent of Documents, located in the Government Printing Office. The Government did not establish this sales office for purposes of profit, but as a public convenience. The prices charged cover only paper and printing, no charge being made for the services of the statesmen and scientists who are the authors of the various books, pamphlets, periodicals, and maps, nor are commissions allowed for their sale. The documents have the freedom of the mails and are sent without postage.

The main condition of purchase is that payment be made in advance of shipment. The Superintendent of Documents is not authorized to supply free copies of anything except Price Lists, which are described in detail on another page.

HOW TO REMIT

Remittances should be made to the Superintendent of Documents, Government Printing Office, Washington, D. C., by coupons, postal money order, express order, or New York draft. If currency is sent, it will be at sender's risk. Foreign orders should be accompanied by international money order or New York draft.

Postage stamps, coins defaced or worn smooth, foreign money, and uncertified checks will not be accepted.

Coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents, may be purchased from this office in sets of twenty for \$1.00.

No charge is made for postage on documents forwarded to points in the United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged.
